NIM: 1841720027

JURUSAN TEKNOLOGI INFORMASI POLITEKNIK NEGERI MALANG

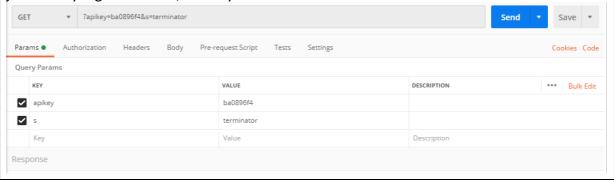

Praktikum – Bagian 1: Registrasi Account di layanan Public API dan Test API menggunakan Postman

7 Masukan parameter key dan value berupa **api key**, value berupa **key**, code pencarian **s** dan judul film yang akan dicari, misalnya **terminator**.

Jika parameter sesuai, akan didapatkan hasil berupa respon JSON dari website OMDB seperti gambar ini.

```

9 Kita juga dapat mencari detail dari sebuah film dengan menggunakan parameter i. hasilnya akan didapatkan data detail dari sebuh film berdasarkan imdbID. Misal kita mencari film dengan ID tt0418279. Maka akan ditampilkan informasi detail dari film tersebut. Selanjutnya kita bisa memasukkan JSON kedalam aplikasi codeigniter untuk membuat tampilan aplikasi yang lebih menarik. <u>Praktikum – Bagian 2: Membuat Aplikasi Movie List Code Igniter Menggunakan Public API</u>

Langkah	Keterangan
1	Duplikasi Project Code-Ketiga dan berilah nama project Code-ketujuh
2	Lakukan perubahan konfigurasi \$config['base_url'] = 'http://localhost/rest-api/Code-ketujuh/'; pada config.php
	21 22 If you need to allow multiple domains, remember that this file is still 23 a PHP script and you can easily do that on your own. 24 25 */ 26 \$config['base_url'] = 'http://localhost/rest-api/Code-ketujuh/'; 27
3	Buatlah sebuah file index.php pada folder view/movie/ dan tuliskan script seperti gambar dibawah ini:

Selanjutnya buat file javascript **script.js** pada folder **assets/js/** kemudian tuliskan script seperti gambar dibawah ini:

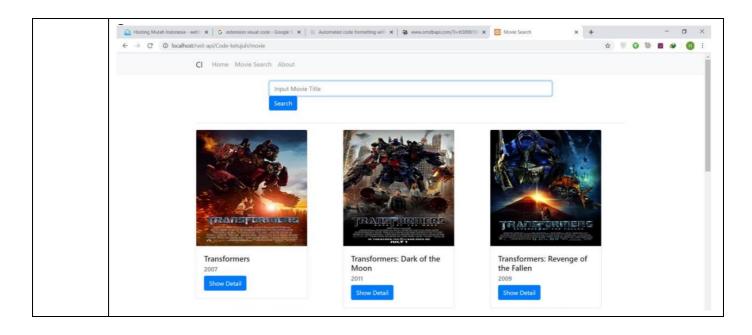

```
JS script.is X
          assets > js > JS script.js > ...
               $("#search-text").on("keyup", function(event) {
                  if (event.keyCode === 13) {
                      searchMovie();
               $("#btn-search").on("click", function() {
                  searchMovie();
               $("#movie-list").on("click", "#btn-details", function(e) {
                   $.ajax({
                      url: "http://www.omdbapi.com",
                      type: "get",
dataType: "json",
                      data: {
                         apikey: "cf031bee",
                      success: function(result) {
   if (result.Response == "True") {
                             $(".modal-body").html("");
$(".modal-body").append(
                                       <div class="col-md-4">
                                          <img src="`</pre>
                                    result.Poster +
                                      class="img-fluid">
                                        <div class="col-md-8">
                                          <h4>` +
                                       result.Title +
                                                  Released : ` +
                                       result.Released +
                                       result.Genre +
                                                  class="list-group-item">Writer : ` +
                                       result.Writer +
                                                  Actor : ` +
                                       result.Actors +
                                                  Production : ` +
                                       result.Production +
                                                  Plot : ` +
                                       result.Plot +
6
```

Tambahkan script pada **footer.php** pada folder **template** seperti gambar dibawah ini:

```
🦬 footer.php 🗙
               application > views > template > ** footer.php > ..

7
             Tambahkan juga script pada header.php pada folder template seperti gambar dibawah ini:
                                                    🦬 header.php 🗙
               application > views > template > ♦ header.php > ..
                       doctype html
<html lang="en"
                         <meta charset="utf-8"</pre>
                         k rel="stylesheet" href="https://stackpath.bootstrapcdn.com/bootstrap/4.1.3/css/bootstrap.min.css" integrity="sha384-
                           .badge {
                              margin-left: 3px;
                          <nav class="navbar navbar-expand-lg navbar-light bg-light">
                              <a class="navbar-brand" href="#">CI</a>
                             <button class="navbar-toggler" type="button" data-toggle="collapse" data-target="#navbarNavAltMarkup" aria-controls="</pre>
                             <div class="collapse navbar-collapse" id="navbarNavAltMarkup">
                                <a class="nav-item nav-link" href="#">Home <span class="sr-only">(current)</span></a>
<a class="nav-item nav-link" href="movie">Movie Search</a>
<a class="nav-item nav-link" href="#">About</a>
8
             Jika sudah selesai, hasil akhir aplikasi pencarian film adalah seperti gambar dibawah ini:
             🚵 Hosting Murah Indonesia - webi 🔞 🖟 extension visual code - Google S 🗴 🗎 Automated code formatting will 🗴 🐞 www.cimdbapi.com/fl=tt389619 🗴 🖺 Movie Search
                                                                                                                                         × +
                                                                                                                                                   * 0 0 0 E 4 0 I
                                                         Input Movie Title
9
             Lakukan pencarian informasi film dengan mengetikan keyword berupa judul film seperti
             gambar dibawah ini:
```
